Aperion Information Technologies, Inc. Announces The Launch Of Intelligent Trucking Solution 1.85.

Oxford, Michigan- Aperion Information Technologies, Inc, a provider of custom software and computer maintenance announced the launch of Intelligent Trucking Solution.

“We feel I.T.S will take any trucking or aggregate company to the next level” said Joshua Mouch, senior computer programmer. “We now give them a great back office management tool with power, and reliability.”

This progressive software will help in organizing and tracking the bids, tickets, invoices and much more. “Since the software runs on the Microsoft SQL Server it provides a stable environment and allows for remote connectivity, across multiple offices in different locations. It will also give the user unlimited number of entries, so you never have to worry about overloading the system:” remarks senior programmer Dan Osterhout.

Intelligent Trucking Solution is fully integrated with QuickBooks Accounting Software along with most major accounting software packages.
